DNV and Trainor join forces to provide cutting-edge eLearning in the Hazardous Area domain

DNV and Trainor have announced a collaboration in the Hazardous Area training domain, making use of cutting-edge eLearning developed by Trainor. -Another step into the global safety training market and a huge acknowledgement of the next generation eLearning we make at Trainor, says Trainor CCO Morten Aasen.

Endorsed by DNV

Ed-Tech company Trainor has for decades provided electrical safety and Ex safety training to a broader energy industry worldwide. As the leading Nordic el-safety training provider, Trainor has already made the Nordic market familiar with the high-quality e-learning developed in gaming engine Unreal.

The eLearning is now endorsed by DNV's Hazardous Area technical center of excellence. Trainor's customers will receive a DNV certificate of training upon completion of the training, recognizing the high quality of the training content and learning system. DNV customers worldwide will get access to the Trainor eLearning through DNV's extensive training catalogue.

The training covers a wide range of safety-critical topics for people who work in Hazardous Areas or use specific equipment related to it. These are areas considered hazardous due to the presence of a potentially explosive mix of flammable gas or dusts which can cause fire or explosion in industrial facilities. Commonly these areas exist in Oil & Gas production and processing facilities, but also in the Chemical, Pharmaceutical, Agricultural and Food & Beverage industries.

Safe design, installation, operation, and maintenance of equipment for use in these areas is critical to increasing the safety of industrial workplaces and the prevention of loss or harm to property and the environment.

ABOUT DNV:

DNV is a leading provider of third-party Product Assurance including a Notified and Accredited Certification Body for safety and performance certification of Hazardous Areas (ATEX, IECEx, UKCA and INMETRO) equipment and protective systems. Whether certifying products, sharing claims, or optimizing and decarbonizing supply chains, DNV helps companies manage risks and realize their long-term strategic goals, improving ESG performance and generating lasting, sustainable results.

ABOUT TRAINOR

Trainor is a leading and innovative EdTech company providing high quality training and digital learning solutions for professionals within the fields of electrical safety and Ex safety. Trainor is a preferred training provider for global players across the Power, Industrial, Oil & Gas, Maritime, and Construction sectors.

Trainor is an internationally recognized EdTech company setting new standards for safety training. We provide training services, digital solutions and technical consultancy services to offshore, maritime and land-based industries worldwide.
